

SEPAND ASA Co.

Since 1983

Your Reliable Partner In Persian Gulf

Who we are?

SEPANDASA marine services LLC.:

- Is a ship repair, maintenance & management group which established in 1983.
- Is a regional player in marine engineering and ship management in Persian Gulf . The group designs, builds and maintains various types of ships, jack up barges, port facilities, etc.. It also provides a full range of services to ports and shipyards same as dredging & wharfs renovations.
- Offers services in engineering, construction, installation, maintenance & tools & equipment procurement of marine industries.
- Technical expertise combines with strong operation & management team, provides best in class service to its clients in Persian Gulf.

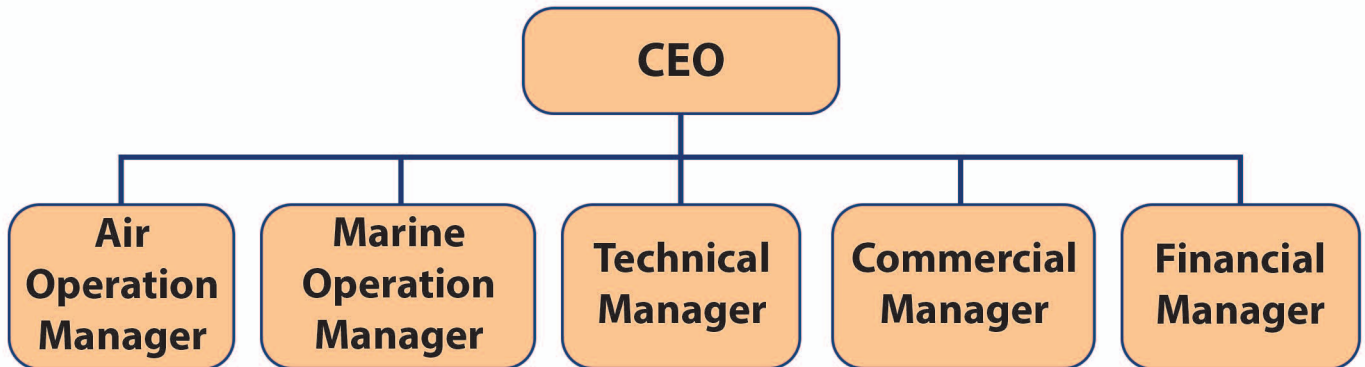

Who we are?

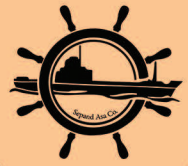

- Specialize in supplying a full range of skills from individuals that slot seamlessly in to your existing team, to full squads complete with our own experienced Team Leaders and Shift Supervisors.
- Can offer Project Managers, QA/QC Inspectors, QHSE Representatives, Draftsmen, Quantity Surveyors and most other project related professions For larger and more complex projects.
- Is providing mobile staff, often with very little notice for relatively short, labour intensive projects such as Ship Repair, Conversion and Offshore Mobilization. As client resources are often stretched, we take care of every aspect of personnel logistics and welfare to ensure that good quality, productive labour is available reliably when and where it is needed. All of our staff have a solid background in Ship Building, Repair & Conversion and are trained to the highest industry standards with a strong focus on Quality, Health & Safety.

Organizational Chart
